Arab Women in Computing 2019 Conference

Poster Submission

TITLE
Title of the Poster to be used in conference proceedings.

SUBMITTER(s)
Names, Title, Organization and contact information for the person(s) who will author and/or present this poster.

TRACK
Indicate which track this poster is related to:
- Research
- Industry, Technology and Applications
- Entrepreneurship
- Women in Tech, Career and Leadership

ABSTRACT
Provide a brief description of your work that will be demonstrated in the poster. For Research posters, an extended description should also be supplied as described below.

AUDIENCE
Who will be interested in the poster? Describe the target audience.
- For a technical poster, indicate if this is Beginner, Intermediate or Advanced level material.
- For a career related poster, indicate if it is for academic, industry or entrepreneurial audiences and whether it is aimed at early, mid or senior levels.

AUTHORS AND PRESENTERS
A brief description of each person's background, including expertise related to the topic and views of the issues.

PARTICIPATION STATEMENT
A statement that the author/presenter have made a commitment to attend the conference and present the poster if it is accepted.

DESCRIPTION
Your submission should tell the poster committee about your work and give us an idea of the content that will be on the poster you want to present at the ArabWIC Conference. Provide information to help the committee determine the relevance, originality and impact of the work your poster covers.

For Research track posters, provide up to a three-page abstract that describes your work, including references. The following organization and text provided in this template is meant as a guide only. You may organize sections differently, but make sure that you clearly address each required component of the extended abstract.

1. PROBLEM AND MOTIVATION
In this section, you should define the problem you are addressing and state the research question(s) you want to address. Explain the reasons for seeking a solution to this problem, why it is significant, and why it is relevant to your research field.

2. BACKGROUND AND RELATED WORK
Explain the specialized and relevant related background necessary to appreciate the work. Include references to the literature where appropriate, and briefly describe how your work is different from related work.

3. APPROACH AND UNIQUENESS
Describe your approach in attacking the problem and how it is novel. Your hypothesis may be here.
- Example subsection: Approach
  Describe your process and how your approach is an improvement on previous work. What makes it novel.

ArabWIC goal is to support, inspire and elevate the impact of Arab women in computing
Poster Submission

- Example subsection: Evaluation
  Describe the research question or hypothesis your poster addresses and experiments you designed to answer it.

4. RESULTS AND CONTRIBUTIONS
Share the results of your work. Discuss their significance and how they contribute to your area of computer science.

- Results:
  Provide an overview of the results. Use tables or figures as appropriate. See below for tips on how to format.

- Contributions
  Describe the impact of your work, how it has contributed to the field.

5. REFERENCES
Include references in the three-page limit. Use the “ACM Reference” references – that is, a numbered list at the end of the article, ordered alphabetically and formatted accordingly. See “TIPS” section for more info.

FORMATTING TIPS
For submission, please create a PDF document from this document. Creating a PDF will ensure that the document looks the way you want it to look.

Use tables or figures as appropriate. Place Tables/Figures/Images in text as close to the references as possible. Write all your text before formatting, e.g., placing the figures and tables.

Captions should be Times New Roman 9-point bold. They should be numbered (e.g., “Table 1” or “Figure 2”); please note that the word for Table and Figure are spelled out. A figure’s captions should be centered beneath the image or picture, and Table captions should be centered above the table body.

For references, use the "ACM Reference format", that is, a numbered list at the end of the article, ordered alphabetically and formatted accordingly. See examples of some typical reference types, in the new “ACM Reference format”, below. Within this template, use the style named references for the text. Acceptable abbreviations, for journal names, can be found here: [http://library.caltech.edu/reference/abbreviations/](http://library.caltech.edu/reference/abbreviations/). Word may try to automatically 'underline' hotlinks in your references; the correct style is NO underlining.

The references are in 9 pt. References should be published materials accessible to the public. Internal technical reports may be cited only if they are easily accessible (i.e., you can give the address to obtain the report within your citation) and may be obtained by any reader. Proprietary information may not be cited. Private communications should be acknowledged, not referenced (e.g., “[Robertson, personal communication]”).

Examples of references:
